Convenience of Local Manufacturing at Offshored Cost

Access Engineering provides you an overall outsourcing solution specialized in metal components. Do you have a design, but not have the manufacturing capability in-house? Or do you have an idea or concept that you want to bring to life? With us as your outsourcing partner, you can benefit from our design experience along with domestic and international network of suppliers.

Complete Turnkey Solutions

With our mechanical design experience and extensive supplier network we offer you complete turnkey solutions.

Affordable

Access to the market's most competitive prices - even at small orders. Typical savings are about 40-80%

Convenient

We provide the ease of communication and comfort of a local manufacturer at much lower cost.

Quick Quotes

It usually takes 2 business days to complete the quotation process.

Risk-Free

US-based company. Two-layered NDA. We can also work with your specific confidentiality requirements. ISO certified reliable suppliers.

Advanced Skills

Experienced in Design for Manufacturability, Computer-aided Design and Drafting, CAE, modern manufacturing techniques and procedures.

CNC & Conventional Machining

Custom machining solutions for your metal parts in our network of highly qualified machine shops.

Sheet Metal Fabrication

Bending, Stamping, Deep Drawing, Rolling, Punching, Press brake forming, Water jet & Laser Cutting and more.

Welding

Welded components and structures produced in all sizes at competitive prices.

Assembly & Installation

Let us handle your components as a package solution. Save money on labor and logistics costs.

Tube Bedding

We can bend most structural shapes including angles, channels, beams, square tubes, rectangular tubes and round tubes.

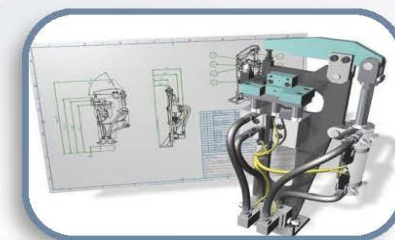

3D Printing & Rapid Prototyping

Fused deposition modeling (FDM) Stereolithography (SLA) and Selective Laser Sintering (SLS).

Computer-aided Design and Drafting

Comprehensive Computer-aided Design, Engineering and Drafting solutions.
